

Following are 2 API for saving and retrieving records. Create a UI form based on Request variables. You are supposed to integrate both API using React and demonstrate.

1. Save Records API:

<http://fintechqrqronboardingbackend-fcwvv1-aa5875-91-108-104-214.traefik.me/api/admin/1/saveApplicationDraft>

Sample request:

```
{ "applicationId": "", "agentId": 1027, "status": "DRAFT", "applName": "parish sir", "city": "Pune",  
  "firm": "Ashish Retail Pvt. Ltd.", "dba": "Ashish Retail", "contactPerson": "Ashish Bhagat",  
  "mobile": "9876543210", "instAddr1": "Shop No. 12", "instAddr2": "Market Yard", "instAddr3":  
  "Near Central Mall", "instLocality": "Shivaji Nagar", "instPincode": "411005", "mcc": "5411",  
  "pan": "ABCDE1234F", "panDob": "1992-08-15", "meAcType": "Current", "meName": "Ashish  
  Bhagat", "melfsc": "HDFC0001234", "meAcNo": "123456789012", "qrBoombox": "ENABLED",  
  "docPath": "/documents/applications/3fa85f64-5717-4562-b3fc-2c963f66afa6/", "creationDate":  
  "2025-09-15", "submissionDate": "2025-09-15", "discrepancyReason": "", "rejectionReason": "",  
  "panPath": "/documents/pan/ABCDE1234F.pdf", "aadhaarPath":  
  "/documents/aadhaar/123456789012.pdf", "bankStatementPath":  
  "/documents/bankStatements/123456789012.pdf", "shopPhotoPath":  
  "/documents/photos/shop_ashish.jpg", "business_type": "Proprietorship" }
```

2. Get Records API:

<http://fintechqrqronboardingbackend-fcwvv1-aa5875-91-108-104-214.traefik.me/api/admin/1/getApplicationByAgentId?page=1&size=9>
